Dolphin Therapy Healthcare Economics for 5,000 Highly Complex Patients

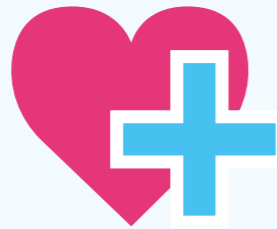

Patients are either placed on Dolphin Therapy for:

PREVENTION PURPOSES
(no existing skin damage)

TREATMENT PURPOSES
(existing skin damage)

These are the most complex patients with multiple comorbidities

Out of 5,000 patients that were placed on Dolphin for prevention purposes:

98%
did not develop skin damage

From July 2022 to March 2024 (600 days), 34% of Category 1,2,3 and 4 pressure ulcers (PUs) were hospital acquired (HAPU).

34%
HAPU

What would the savings be if these treatment patients had been placed on Dolphin Therapy for prevention of skin damage, and 98% of these HAPUs were prevented?

Category 1

Number of HAPU: 83
Number of HAPU if 98% Prevented: 2

£136,000 Treatment Costs
£3,000 Treatment Costs if 98% Prevented

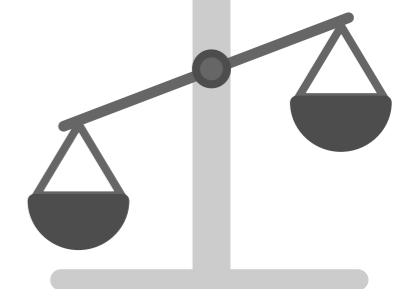

Saving: **£133,000**

Category 2

Number of HAPU: 268
Number of HAPU if 98% Prevented: 5

£1,185,000 Treatment Costs
£34,000 Treatment Costs if 98% Prevented

Saving: **£1,178,000**

Category 3

Number of HAPU: 118
Number of HAPU if 98% Prevented: 2

£1,327,000 Treatment Costs
£22,000 Treatment Costs if 98% Prevented

Saving: **£1,305,000**

Category 4

Number of HAPU: 142
Number of HAPU if 98% Prevented: 3

£2,305,000 Treatment Costs
£49,000 Treatment Costs if 98% Prevented

Saving: **£2,256,000**

*Pressure ulcers: productivity calculator 2017. Department of Health and Social Care.
